Multi-Site

Edge Storage

Camera Health Checks and Alerts

Solution Overview

- Replacement for On-Premise Video Surveillance Systems (e.g. NVR, DVR)
- Direct connection from camera to cloud, no on-site hardware
- World-class person, vehicle, animal and object detection
- All the camera access, configuration, video storage, alerts and other features are managed through the cloud
- Open Platform – works with a large number of Premium Cameras
- Unlimited locations, users and cameras can be supported inside one account
- Powerful, easy-to-use Web and Mobile Apps (Android, iOS)

World-Class Person, Vehicle, Animal and Object Detection

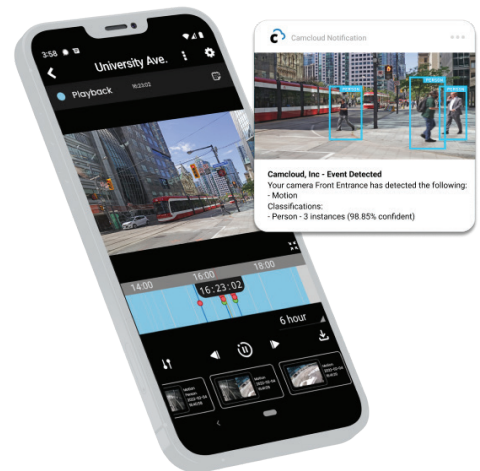

1 World-class AI at your fingertips

2 Turn noisy camera motion detection alerts into smart surveillance

3 Smart push notifications

Open Platform

The Camcloud solution does not require any specialized on-premise hardware and works seamlessly with hundreds of leading IP camera models. Our Plug and Play camera integrations allows customers to setup their cameras in minutes while eliminating any complex network configuration.

About Camcloud

Thousands of businesses rely on the Camcloud platform. The company is the go-to solution provider for multi-location enterprises who want a hardware-free video surveillance system. Our solution is supported by a large network of security integrators who provide a complete solution for your video surveillance needs.
